Summary

- Frontend Developer with 3+ years of experience building scalable, high-performance web applications using React.js and Next.js.
- Skilled in TypeScript, Tailwind CSS, SSR, SSG, and performance optimization with focus on Core Web Vitals.
- Hands-on experience with modern tools like Zustand, React Hook Form, Framer Motion, and Headless CMS (Sanity).
- Built and deployed multiple full-stack applications used by 400+ users with real-time features and role-based dashboards.

Education

Bachelor of Computer Applications (BCA)

2024 – Present

P.D. Pandya Institute of Computer Application, Ahmedabad

Currently in 4th Semester

Experience

Frontend Developer (React.js, Next.js, TypeScript) & UI/UX Designer

Sep 2025 – Present

Xtenal Technologies

- Revamped 80% of application UI improving user experience and engagement.
- Refactored 5000+ lines of legacy code following clean architecture and modular design.
- Built SEO-optimized frontend using Next.js with SSR and SSG strategies.
- Implemented performance optimizations improving load speed and Core Web Vitals.
- Integrated Zustand and Redux for scalable state management.
- Developed responsive UI with Tailwind CSS, animations using Framer Motion, and forms using React Hook Form.
- Worked closely with backend teams to integrate APIs and deploy production-ready features.
- Wrote clean, maintainable, and scalable code using TypeScript and modern frontend architecture.
- Projects worked on: Polzet, Test Frontend

Full Stack Developer Intern

3 Months

Unified Mentor (Remote)

- Developed full-stack applications including InvestBridge and RechargeBunkPortal.
- Built responsive UI and integrated backend APIs using Firebase and Node.js.
- Implemented authentication, real-time features, and role-based dashboards.

Projects

Sansai (AI Career Platform) | Next.js, Tailwind, Prisma, Clerk

Live Link

- Built AI-powered platform for resume generation, mock interviews, and career tracking.
- Reduced CV creation time from 40 minutes to 5 minutes using AI workflows.
- Implemented SSR, authentication, and role-based dashboards.

InvestBridge | React, Firebase, TypeScript

Live Link

- Developed platform connecting investors and entrepreneurs with real-time interactions.
- Built authentication, notifications, and role-based dashboards.
- Integrated Firebase backend with analytics and push notifications.

LMS Full Stack Platform | Next.js, Node.js, MongoDB

GitHub

- Built real-time LMS with quizzes, admin dashboard, and live features using Socket.io.
- Implemented secure authentication and scalable backend architecture.

Technical Skills

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Radix UI, Framer Motion, React Hook Form

Backend: Node.js, Express.js, Firebase (Auth, Firestore, Cloud Functions), Prisma, MongoDB, Redis

State Management: Redux, Zustand, RTK Query

Performance: SSR, SSG, Core Web Vitals Optimization, Lazy Loading, Code Splitting

Tools: Git, GitHub, Vercel, Firebase Hosting, Postman

Other: Headless CMS (Sanity), REST APIs, JWT, Socket.io
